

Project Locations management workflow

(For testing purposes)

Welcome to the guide for collecting and updating **Project Locations** at KfW. This guide has been prepared for external consultants and members of KfW Sector Teams.

Version: 2026-v0 · **Glossary** (hover over highlighted terms anywhere for a quick definition)

New collection or updating existing data?

- **New collection or updating existing collection** → start at Step 1: Collect
- **Existing collection with older version of Project Location Model (PLM Excel template; older than version 4.0)** → read Updating existing data first

In order to check the Project Locations Model (PLM) Excel version number, refer to the template file number. Here is an example:

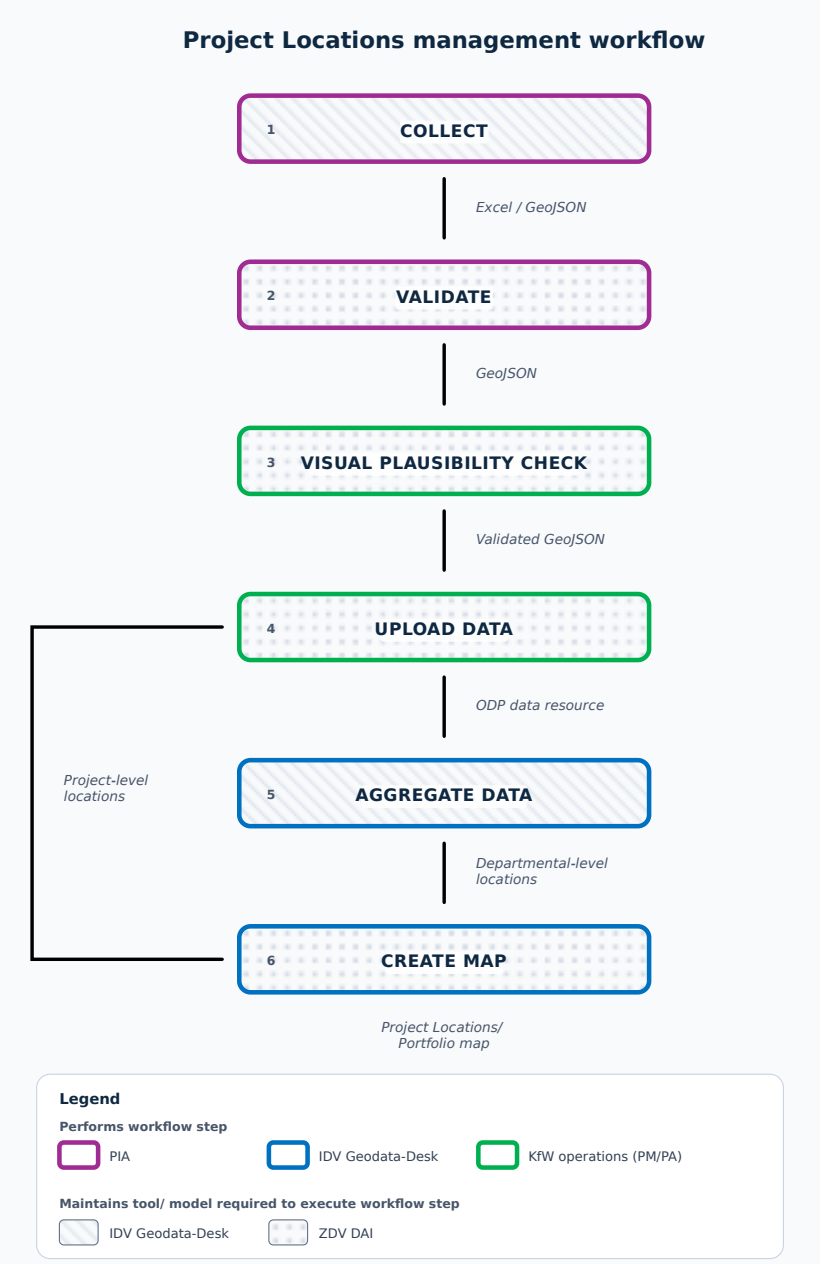

Project_Location_Data_Template_EN_V04.xlsx

Interactive workflow

Click a step in the diagram below to access more detailed instructions. The overview diagram is also linked from every step page.

Click a step box to open its instructions.

Steps at a glance

#	Step	Tool	Performer	Maintainer
1	Collect	Project Locations Model (PLM)	external consultants	KfW Geodata-Desk
2	Validate	Online validator	external consultants	KfW Team Data Analytics & Artificial Intelligence (DAI)
3	Visual plausibility check	Online validator	KfW sector teams (project managers/ project analysts)	KfW Team Data Analytics & Artificial Intelligence (DAI)
4	Upload data	KfW Open Data Platform (ODP)	KfW sector teams (project managers/ project analysts)	KfW Team Data Analytics & Artificial Intelligence (DAI)
5	Aggregate data	Python script	KfW Geodata-Desk	KfW Geodata-Desk
6	Create map	KfW Open Data Platform (ODP)	KfW Geodata-Desk	KfW Team Data Analytics & Artificial Intelligence (DAI)

For authors

See [Creating the workflow guide](#) for how to edit this documentation in Git.

Structural changes (steps, roles, links) → edit `workflow.yaml` in the repository root.

Procedural detail and screenshots → edit the relevant file under docs/steps/ .
